

The figure displays 15 time series, grouped by model color (blue, orange, green) and type (raw, avg, thrs). The 'raw' series are highly volatile, while the 'avg' and 'thrs' series are smoother. The plot shows a clear trend of increasing variance over time, with the 'raw' series exhibiting the most extreme fluctuations. The legend on the left identifies the series as follows:

- raw (blue)
- avg (orange)
- thrs (green)
- raw (blue)
- avg (orange)
- thrs (green)
- raw (blue)
- avg (orange)
- thrs (green)
- raw (blue)
- avg (orange)
- thrs (green)
- raw (blue)
- avg (orange)
- thrs (green)
